A new jet airfield is under construction in the Caslav - Chotusice area (050/M47). The area of the construction site is ten square kilometers. As of late  the terrain was being leveled by ten bulldozers. Pipelines had been laid to Vrabcov lake, which would supply the construction site with water. Adjacent highways have been closed to civilian traffic. The material used in the construction is stored in wooden sheds scattered about the construction site. According to the source, this airfield is to be the largest and best jet airfield in Czechoslovakia. A part of the project is supposed to be underground.
